

Exordium 2023 (a pre-recruitment analysis)

Date: March 04, 2023

Preface for Web/App Developer:

Enliven your tiniest desires and create your ideas into something more. Web development brings an opportunity to do the same with the basics of HTML, CSS, and many more. Create a new realm with just your fingertips and connect with us for learning more about such tricks.

Exhibit your ideas to our team and stand out among the crowd. All the best wishes!

Tasks:

Build a website that may serve the purpose of the HITian Inside Interface containing the details given below by **10th March 11:59 PM**.

Your work should be aligned with the rules given below.

Rules:

1. It should have a good **User Interface (UI)**.
2. Clean code with proper comments and indentation.
3. Creativity should be maintained throughout.
4. Maintain proper folders for different languages and images.
5. Keep the **readme file** with a proper explanation of your **logic and the languages** used.
6. **Upload** your work post-completion to the following link: [Click Here!](#)

Information:

1. Use the following Fields in the **Navbar**:
Home, About, Gallery, Events, Merchandise, Contact-us.
2. Try not to make any form in the front-end part except **Contact us** having three fields (Name, E-mail, Message Box) in the contact form.
3. Usage of various shades of maroon as the prime color is advised.
4. Use the Instagram image link if you need more images for the gallery page.
5. Use dummy images if required.
6. You can also share your code using the GitHub repository.
7. One can also **preferably use Flutter as well as Unity** for the given task.
8. **Mention in the readme file** if you have basic knowledge about **Flutter and Unity**.
